## REMARKS:

5-2 Per our tel. con. *[Signature]*

This is useless letter. Prime reasons for  
 [ ] action are: (1) slow delivery of CV-1 25X1  
 and (2) desire for U.S. sterile unit. Why SPD  
 coordination? *[Signature]*

FROM: Chief, KUCLUB

SUBJECT: General: Engineering

Specific: Transistorized Converters

/ This Dispatch requires action. Paragraph 3 contains the details.

1. A review of the engineering section of your July report revealed that you are having developed a Transistorized Converter similar to the CV-1.

2. Information is requested as to whether deficiencies in the CV-1 caused you to initiate this parallel development. If this is the case, we would appreciate detailed data on these deficiencies so that steps can be taken to correct them.
